Ellepot H-211

Semi-Automatic Ellepot Machine | Technical Data Sheet

Overview

The H-211 is a semi-automatic Ellepot machine for smaller-scale operations using one pot or plug size. Its single production line produces Ellepots from 50 to 80 mm for propagation or stepping young plants into larger pots across fruit, nut, bedding plant and forestry production.

Key Features

- Single production line
- Pot diameters from 50 to 80 mm
- Adjustable pot length up to 240 mm
- Capacity up to 5,000 pots per hour
- Suitable for propagation and step-up production
- Compatible with Multiflex automation

Specifications

Parameter	Specification
Machine type	Semi-automatic, single production line
Pot diameter	50 - 80 mm
Pot length	Adjustable up to 240 mm
Capacity	Up to 5,000 pots per hour (depends on pot size and peat)
Typical applications	Fruit, nuts, bedding plants, forestry and other nursery crops
Automation	Compatible with Ellepot Multiflex

Multiflex Automation Upgrade

The H-211 can be upgraded with the Ellepot Multiflex for automatic insertion of Ellepots into trays. Optional dibbling and seeding modules can support a hands-free propagation process and reduce handling labour.

Available Ellepot Tray® Pot Diameters

Ø50	Ø60	Ø65	Ø70	Ø80
