Ellepot Live

Integrated Production Management | Technical Sheet

Overview

Ellepot Live combines an intuitive mobile app and customer web portal to provide real-time production visibility, preventive maintenance support, production planning and streamlined reordering. The system helps growers reduce downtime, improve machine utilisation and organise production materials and spare parts.

Key Capabilities

- Real-time machine and production status
- Preventive maintenance alerts
- Daily efficiency statistics in the app
- Weekly, monthly and quarterly web reporting
- Production material calculations and planning
- Rapid spare-parts reordering and support

System Functions

Function	Capability
Live production monitoring	View machine status, output and efficiency data in real time
Maintenance management	Receive early maintenance warnings and access spare-part or technician pathways
Daily statistics	Review vital efficiency metrics from the mobile app
Periodic reporting	Analyse weekly, monthly and quarterly trends through the customer web portal
Production planner	Calculate required production materials to support planned output
Parts ordering	Scan supported paper or tray QR codes and submit roll quantities to the sales team
Digital assistance	Access troubleshooting support through Ellepot Live

Access and Operational Value

Mobile App	Customer Web Portal	Operational Benefits
Real-time updates, daily statistics and access while onsite or on the move.	Detailed periodic trends and production-management information.	Less unplanned downtime, improved output visibility, faster parts ordering and better workflow decisions.

Enquiries and Demonstration

For an Ellepot Live demonstration, machine compatibility advice or service information, contact Proptec at **07 3177 1700** or **info@proptec.com.au**.

Features and availability may vary by machine, configuration, region and service plan.
