Ellepot Tray Filler Jumbo

Automatic Jumbo Tray Filler | Technical Data Sheet

Overview

The Tray Filler Jumbo is an automatic system for producing and tray-filling large Ellepots from 80 to 120 mm. Designed for fruit, nut and forestry production, it combines flexible jumbo-pot production with high output, irrigation and customised drilling for stepping up young plants.

Key Features

- Automatic production and tray filling
- Jumbo Ellepots from 80 to 120 mm
- Up to 4,000 pots per hour
- Ellepot height up to 300 mm
- Irrigation unit included in the process
- Customised drilling unit for step-up production

Specifications

Parameter	Specification
Machine type	Automatic Jumbo Ellepot production and tray-filling system
Pot diameter	80 - 120 mm
Ellepot height	Up to 300 mm
Capacity	Up to 4,000 pots per hour (depends on pot size and peat)
Process equipment	Irrigation unit and customised drilling unit for step-up
Typical applications	Fruit, nut and forestry nurseries

Patented Jumbo-Pot Technology

The system combines high-capacity Jumbo Ellepot production with efficient drilling, irrigation and automatic tray filling. It is suited to step-up production for crops including kiwi, cherry, apple, peach, avocado, macadamia and mango.

Compatible AIRtray® Options

Ø100 Air100008-XD	**Ø120 Air 120006**	**Ø120 006Global**
